\hline Product name \& \multicolumn{2}{|l|}{Probemix P243 SERPING1-F12} \\
\hline LOT \& \multicolumn{2}{|l|}{B1-1021} \\
\hline \(\sqrt{8}\) \& \multicolumn{2}{|l|}{25,50 , or 100 reactions.} \\
\hline Shipping conditions \& \multicolumn{2}{|l|}{Dry ice or cooling elements.} \\
\hline 1 \& \multicolumn{2}{|l|}{Store upon arrival between \(-25^{\circ} \mathrm{C}\) and \(-15^{\circ} \mathrm{C}\).} \\
\hline \[
8
\] \& \multicolumn{2}{|l|}{Expiration date: October 2026, when stored at recommended conditions. This product should not be frozen/thawed more than 25 times.} \\
\hline Purpose \& \multicolumn{2}{|l|}{This product has been developed to determine the DNA copy number of the human SERPING1 and F12 genes, as described in table 1 and 2 of the product. This probemix is designed for use only in combination with SALSA MLPA reagent kits and Coffalyser.Net analysis software as described in the MLPA General Protocol.} \\
\hline Quality control specifications \& \begin{tabular}{l}
- Sufficient distance between peaks, absence of extra or shoulder peaks, and completeness of hybridisation of each individual probe, as tested on Applied Biosystems and Beckman/SCIEX GeXP sequencers. \\
- Standard deviation of each individual probe \(\leq 0.10\), when tested on 23 different DNA samples of healthy individuals, extracted by various methods. \\
- Each individual probe meets reaction-specific criteria when tested on a single DNA sample under various experimental conditions. \\
- No-DNA controls result in only five major peaks shorter than 121 nucleotides ( nt ): four Q -fragments at \(64,70,76\) and 82 nt , and one peak in the range of \(0-40 \mathrm{nt}\) corresponding to the unused portion of the fluorescent PCR primer. Non-specific peaks longer than 121 nt AND with a height \(<25 \%\) of the median of the four Q-fragments are not expected to affect MLPA reactions when sufficient (50-250 ng ) sample DNA is used.
\end{tabular} \& Test result

\end{tabular}

None of the ingredients are derived from humans, animals, or pathogenic bacteria. Based on the concentrations present, none of the ingredients are hazardous as defined by the Hazard Communication Standard. A Safety Data Sheet (SDS) is not required for these products: none of the preparations contain dangerous substances (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and amendments) at concentrations requiring distribution of an SDS (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and 1907/2006 [REACH] and amendments). If spills occur, clean with water and follow appropriate site procedures.

## Certificate of Analysis <br> SALSA MLPA Probemix P243-B1 SERPING1-F12 sample picture

Figure 1. Capillary electrophoresis pattern from a sample of approximately 50 ng human male control DNA analysed with SALSA MLPA Probemix P243 SERPING1-F12 (B1-1021).

This lot was certified by MRC Holland on 25 February 2022.
This certificate is a declaration of analysis at the time of the manufacturing process. All assays were run in compliance with manufacturer's instructions for use.

## Implemented changes in the COA

Version 01 - 25 February 2022 (6)

- Not applicable, new document.
